Dear Chairman Hundt and Commissioners:

**RE: CS Docket No. 97-55, FCC 97-34**

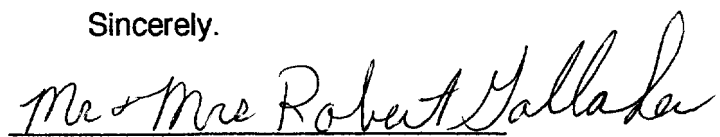

We are writing on behalf of the National PTA and the Third Ward PTA to voice our opposition to the v-chip rating system as presented by Jack Valenti, Chair of the TV Rating Implementation Group, on January 17, 1997. The rating symbol on the TV screen does not provide sufficient content so that parents can make decisions about what is appropriate TV programming for their children. Major surveys released this fall which demonstrate overwhelming parent preference for a rating system that gives parents information about the content of programs were conducted by the National PTA, *U.S. News and World Report*, and Media Studies Center/Roper. Parents do not want the TV industry to interpret what is best for their children. Parents want to make those choices themselves based on content information about the program. Any rating system without content descriptions on the screen and publicized in periodicals that carry TV scheduling is useless.

The FCC, by law, is required to determine whether the industry's rating system has met statutory requirements of the Telecommunications Act of 1996. We do not believe this system does so and ask that the FCC not approve the industry rating system. Instead, we request the following:

- \* That under no circumstances should the FCC approve the industry's rating system. Further, the FCC should accept no rating system that does not include content information about programs such as V (for violence), S (for sexual depiction and nudity) and L (for language);
- \* That the FCC require a V-chip band broad enough that would allow parents to receive more than one rating system;
- \* That the rating icon on the TV screen be made larger, more prominently placed on the screen, and appear more frequently during the course of a program;
- \* That the rating board be independent of the industry and that it include parents; and
- \* That any rating system approved by the FCC be evaluated by independent research to determine if it meets the needs of parents.

Thank you for this opportunity to comment on an issue so important to children and families.

Sincerely,

  
Clearfield, Pennsylvania

DOCKET FILE COPY ORIGINAL

Dear Chairman Hundt and Commissioners,

RE: CS Docket No. 97-55, FCC 97-34

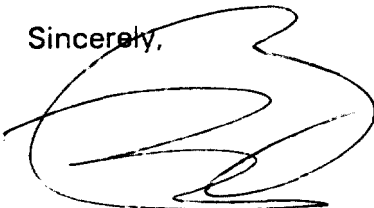

I am writing this letter to express my views on the v-chip rating system. I am opposed to the system presented by Jack Valenti, Chair of the TV Rating Implementation Group. This system does not provide sufficient content information to allow parents, families and caregivers to make appropriate television viewing decisions where children are concerned. I strongly urge you to implement a system which:

- Includes content information about programs such a V-violence, S-sexual depiction/nudity, L-language, etc.;
- Utilizes V-chip bands broad enough that would allow parents to receive more than one rating system;
- Uses larger, more prominently placed rating icons on screen and appearing more frequently during a program;
- Is decided by a rating board independent of the industry and the FCC, to include parents;
- Will be evaluated by independent research to determine if the system meets the needs of parents .

Parents do not want the TV industry to interpret what is best for their children; parents must be allowed to make these choices themselves. A ratings system based on content information on screen and publicized in TV scheduling periodicals is the only acceptable choice.

Thank you for this opportunity to comment on an issue so important to children and families.

Sincerely,

Terry L. Phillips
